

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR ADDING
SUPPLY CHAIN COMPONENTS IN A SUPPLY CHAIN MANAGEMENT
ANALYSIS**

5

ABSTRACT

A system, method and computer program product are disclosed for adding components in a supply chain management analysis. A query is entered in a search field of a graphical
10 user interface for searching for a plurality of supply chain components. Results of the search are listed in a results field of the graphical user interface. The results are then selected from the results field for inclusion in a supply chain analysis.
